

**eZEN**

**eZEN** For all those  
who appreciate total  
cleanliness and good health.

## \*IB-7500

An EZEN BIDET can help you to have a clean and healthy life after each use.

An EZEN BIDET also can relieve users from constipation, hemorrhoids, and other related diseases with an "Enema wash function".

- Size : W495mm(19.4inch) X L525mm(20.6inch) X H85mm(3.28inch)
- Hygienic functions : Ozonation function(Moving wash), Feminine wash(Bidet), Rhythm wash(Massage wash), Posterior wash, Nozzle self-cleaning function.
- Comfortable functions : Warm Heated Seat, Adjustable water temperature, Warm Air dryer, Automatic Deodorizer, Antibacterial plastic materials.
- High technology functions : Enema wash, Slow down of seat and lid, User occupied sensor, Power saving function.
- Color : White, Ivory.

## FUNCTIONS.

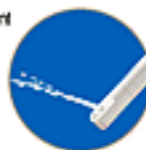

### Enema Wash Nozzle

**ENEMA WASH :** The special nozzle for the "Enema Function" sprays aerated soft water into the rectum. The water softens dry feces, and helps feces leave the body easily.

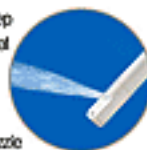

### Feminine Wash (Bidet)

A bidet nozzle that is different from the shower nozzle extends and rinses a woman's delicate parts.

### Posterior Wash (Shower)

A nozzle extends from deep in the back of the toilet seat and sprays a stream of warm water from its tip. The warm water spraying from the 3 holes in the nozzle takes the form of a shower which rinses the posterior. This shower feels incredibly soft as it cleans the posterior.

### Intelligent Power Saving Function

Allows the bidet to conserve energy and water.

### Intelligent Control Operation panel

Main function buttons are larger than other operation buttons. Making the bidet easier to use.

### Heated Toilet Seat.

With a heated seat there will be no more surprises when you sit down.

### Toilet Lid and Toilet Seat "Slow Down"

Hydraulics prevent the seat from falling too quickly, and damaging the bidet.

### Warm air drying

Warm air drying function almost eliminates the need for toilet tissue.

**eZEN** is the first electronic toilet seat with  
an Enema Function in the world.

1. The aerated soft water can spray into the rectum without any pain. Once the spray reaches dried feces it softens the feces, so that it may easily be removed from the body with gentle pushing.
2. The more a person uses the "Enema Function" the healthier they may become. This function can help people who suffer from constipation and piles relieve some of their pain and discomfort.

- Patent pending in Korea -

**\*IB-7500R**  
(Remote controller model)

All operating functions are controlled from the remote control panel.

This is more comfortable for disabled and elderly persons.

- Size : W475mm(18.7inch) X L525mm(20.6inch) X H195mm(7.28inch)
- Hygienic functions : Oscillation function(Moving wash), Feminine wash(Bidet), Rhythm wash, Nozzle self-cleaning function
- Comfortable functions : Warm Heated Seat, Adjustable water temperature, Antibacterial plastic materials
- High technology functions : **Enema wash**, Slow down of seat and lid, User occupied sensor, Power saving function, Remote control
- Color : White, Ivory

### Self-Cleaning Function

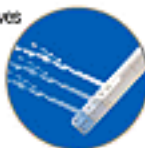

Cleaning of the 3 nozzles (posterior, bidet, enema wash) is done automatically before and after each use.

### Oscillation function

While washing, the nozzle moves from front to rear position, automatically. It allows wider cleansing. In addition, the movement distance of the oscillating nozzle can be adjusted.

(Patent pending in Korea)

### Rhythm Wash function (Massage Wash)

It also has a massaging effect which works as a suitable stimulus for improving the blood circulation or hemorrhoids. In addition, the count of rhythm can be adjustable by user's preference. (Patent pending in Korea)

### 7 Year Odor Neutralizer (Deodorizer)

The deodorizer eliminates common odors that occur around the toilet. The deodorizer is designed to last for 7 years.

### Easy-to-Install

The bidet can be easily installed by anyone who has some handy man knowledge. The bidet will fit onto one piece and two piece toilets.

### Digital Occupied Seat Sensor

Sensors located underneath the seat, prevent any unfortunate accidents. Only when someone is seated firmly on the bidet will it be able to function.

### Remote Controller

The IB-7500R operates by remote control. This remote allows any one to operate the bidet conveniently. The remote can also be mounted for even easier operation.

### Simple Operation Panel

If the Remote Controller's batteries are drained, the user can control the basic functions of the bidet with this panel. (IB-7500R Only)
